

**Esercitazioni alla maniera
di
Arcimboldo**

Lezioni di disegno

Saper fare: componi un ritratto con la frutta e gli ortaggi

Osserva attentamente...

Il pittore italiano Giuseppe Arcimboldo ha composto diversi ironici ritratti utilizzando frutta, ortaggi e altri elementi naturali; per farlo sfruttava i loro colori sgargianti e le loro forme, scegliendo quelle che si adattavano meglio a rappresentare dei tratti del volto.

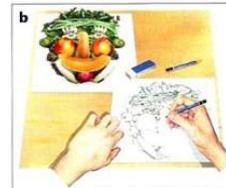

Giuseppe Arcimboldo, L'estate, olio su tavola, 1563; Vienna, Museo delle Belle Arti.

... ora prova tu

Componi anche tu un ritratto di frutta e ortaggi.

- Disegna la sagoma e i tratti principali di un volto su un foglio bianco.
- Procurati della frutta e degli ortaggi e usali per comporre il ritratto che hai disegnato (a). Se ritieni che sia necessario, puoi tagliarli per adattarne la forma a ciò che vuoi rappresentare.
- Su un altro foglio, dipingi il ritratto che hai composto servendoti delle tempere (b): colora secondo i colori della realtà e cerca di riprodurre le zone di luce e di ombra per dare volume agli elementi (c).

Materiale

- frutta e ortaggi veri
- coltello e forbici
- due fogli bianchi
- matita
- tempere

In questa lezione sono proposte due tipi di esercitazioni:

- 1) **Riprodurre un ritratto, composto di frutta ed ortaggi, come nella scheda al lato**
- 2) **Realizzare un ritratto-collage ritagliando la frutta e gli ortaggi dalle diapositive seguenti.**

Dopo aver osservato i due esempi che seguono, stampa le slides che ti servono, ritagliale e componi il tuo ritratto alla maniera di Arcimboldo...

N.B. se ti servissero più figure uguali, stampa più volte la stessa slide.
